

## 2019 IDAHO RACE PROCESSES

---

This document is to provide more detail and clarification of the Idaho Race Processes that are not found in the Idaho Rule Book. If there is a discrepancy between the Idaho Rule Book and this document, then the rule book shall serve as the primary rule. Mistakes and omissions may be corrected by decision of the rules committee.

### ROUND ROBIN PROCESS

---

In order to manage the number of participants attending each race, the league will be hosting six races during the 2019 season. Each team will be assigned to five of these races with one bye week when the team will not be racing. For the 2019 season all teams will attend the first race and the state championship race. The other three races will be selected from four possible venues and dates.

Selection of the assigned races will be made during the pre-season with each team being allowed to provide input for their team's priority for each race.

Each team will be able to select one home race for which they will be guaranteed attendance. The home race does not need to be the race closest to the team's practice location.

Based on a random draw, each team's priority will be applied against the capacity of each venue to determine the final schedule for each team. The first pass for selection will be from highest draw to lowest. For the second pass the order will be reversed.

For capacity purposes each team's size will be assumed to be the team's average race attendance from the prior season for both high school and middle school student athletes. New teams, that were not just a renaming or reorganization from the prior season, will be assumed to consist of 10 racing student-athletes. Deviations from the size determination can be made based on approval from the league director.

Independent Racers and Teams that were registered after the venue assignment process is complete will be scheduled based on the league director's discretion.

No student-athlete may race during their team's scheduled bye week. A student-athlete who switches teams' mid-season that would be otherwise scheduled to race in all races will drop the bye week race of the new team.

## REGISTRATION AND PETITIONS

---

### REGISTRATION

All student-athletes must be registered for each race prior to the deadline for that race. This is generally the Tuesday prior to the race. Registration can be accomplished in one of two ways:

- Purchasing a Season Pass prior to August 1<sup>st</sup>: A season pass provides access to all five eligible race weekends as well as including camping fees.
- Individual Race Registration: those Student-Athletes not selecting a season pass can register for each race individually. Registration must be completed by Tuesday at midnight (mountain time) prior to each race.

**There is no same day registration for the 2019 season**

### PETITIONS

Petitions for category changes must be submitted the Friday, one week prior, to a race to have time to implement, if approved. All petitions must be submitted using the google form at:

<http://www.idahomtb.org/e-coaching/coach-resources/>.

The google form must be submitted by the student-athletes coach or team director.

## SCORING CALCULATIONS

All individual scoring for season-based calculations will use ‘drop one average’ methodology. This methodology calculates the score for each student-athlete’s season results by dropping the single lowest score before creating the average. A scheduled race that was not attended is treated as a zero in the averaging process and is eligible to be dropped from the calculation as the lowest score. A race that is a bye week is not included in the averaging calculation.

Team scores do not use a ‘drop one average’ methodology.

## MIDDLE SCHOOL PROGRAM

---

### MIDDLE SCHOOL RACING EXPERIENCE

Middle school participation focuses on fun while developing skills, fitness and trail etiquette as the primary goals. Competition is a secondary goal.

All NICA rules, as published in the current rulebook apply to the middle school races unless they are specifically addressed here.

- Middle School student-athletes are not eligible to upgrade to High School categories
- Middle School student-athletes will not earn points toward High School team totals.
- Middle School races are not a series. They are a set of individual races. The results from one race do not carry over to subsequent races except for the purpose of staging.

### MIDDLE SCHOOL CATEGORY PLACEMENT

There are three middle school categories within each gender:

|                       |   |
|-----------------------|---|
| 6 <sup>th</sup> Grade | Current Season 6 <sup>th</sup> Graders ONLY |
| 7 <sup>th</sup> Grade | Current Season 7 <sup>th</sup> Graders ONLY |
| 8 <sup>th</sup> Grade | Current Season 8 <sup>th</sup> Graders ONLY |

Race categories that exceed or are expected to exceed 50 participants will be divided at the beginning of the season into A and B (and C if necessary) categories by grade.

The initial placement of individual student-athletes into the A or B category will be based on the results of a prologue which is held at the time of the first race as described below.

The fastest finishers in the prologue will be placed into the A category for subsequent races with the remainder being placed into the B and C categories. The league will consider expected growth and other circumstances when determining the exact division with the intent of balancing the field size.

Student-athletes who are unable to participate in the prologue will be assigned to the lowest category within their respective grade.

#### **A/B UPGRADES OR DOWNGRADES**

Student-athletes participating in grades that have been split into A/B/C categories will be allowed to petition for a category change (subject to the same rules and deadlines as high school students) from 'A' to 'B' or 'B' to 'A' only after the prologue and participating in at least one NICA race. A downgrade request will be considered only based on extenuating circumstances.

All petitions must be submitted by the Team Director to the League Director. A committee will review all petitions and either grant or deny the request based on the information provided.

#### **FIRST RACE PROLOGUE**

A prologue time trial will be held during the first race of the season

Prologue starts are individual starts with an approximate interval of 5 seconds between each rider.

Riders will approach the start line where a timer will confirm their number and provide a count down before starting each rider. Student-

Athlete's times will be clocked via RFID chip timing upon crossing the timing mat at the finish line.

### STAGING AND START ORDER FOR THE PROLOGUE

1. Student Athletes meeting the preregistration deadlines will be staged and started using random selection.
2. Any rider that misses their placement into the staging group/order will be placed at the end of the line.

### SUBSEQUENT RACE STAGING

#### **Race Two:**

Student Athletes will be staged based on the following order:

1. Preregistered Student Athletes based on results in descending order from the Prologue
2. Preregistered Student Athletes who did not race in the prologue based on random selection

There will be a separate call up and staging process for each start group if the category has been divided into 'A' and 'B' sub-categories.

#### **Race Three through Six:**

Staging for race three through six will be based on the cumulative results of race one through five using 'drop one average' points methodology.

Student Athletes will be staged based on the following order:

1. Preregistered Student Athletes based in descending order from the current season results.
2. Preregistered Student Athletes who do not have current season results based on random order

There will be a separate call up and staging process for each start group if the category has been divided into 'A' and 'B' fields.

## MIDDLE SCHOOL AWARDS AND PODIUMS

### **Prologue Awards and Podiums:**

Podium depth will be five deep. Awards will be based on the fastest lap times as recorded by the league's timing system. If student-athletes on the podium record identical times, then they will be considered to have tied. A 'Strong Jersey' will be awarded to the top finisher in each category.

### **Race Two Through Five Awards and Podiums:**

Awards are based on that race only. In other words, there is no consideration of cumulative results when determining the middle school podium.

Any category that has been split into 'A' and 'B' sub-categories groups will have separate podiums. Podium depth will be five deep. Awards will be based on the fastest results as recorded by the league's timing system. If student-athletes on the podium record identical times, then they will be considered to have tied. A 'Strong Jersey' will be awarded to the top finisher in each category.

### **Automatic Upgrade:**

Any student-athlete who finishes on the "B" podium and has a lap time that is faster than the average lap time of the "A" category will be automatically upgraded for subsequent races.

## HIGH SCHOOL PROGRAM

---

### HIGH SCHOOL RACING

High School racing adds to the middle school experience by including team competition as well as individual cumulative competition. Each team is scored based on its student-athlete's performance in the race with small teams and large teams competing in different divisions. At

the end of the season the team in each division with the most cumulative points is awarded the state championship trophy.

The individual with the most points in each category during the season is awarded and entitled to wear a distinctive “leader’s jersey” during each race in which they hold the honor. Additionally, the individual in each category with the most points at the end of the season is awarded the state champion jersey.

In 2019, the IICL is introducing ‘ability-based’ categories. This is intended to create a better progression of competition while maximizing safety and fun.

### CATEGORY AVAILABILITY

There are four high school categories within each gender:

|                  |  |
|------------------|--|
| Freshman         | Current season 9th Graders ONLY  |
| Junior Varsity 2 | Current season 10 <sup>th</sup> , 11 <sup>th</sup> and 12 <sup>th</sup> graders not qualifying for JV 1 or Varsity   |
| Junior Varsity 1 | Current season 10 <sup>th</sup> , 11 <sup>th</sup> and 12 <sup>th</sup> graders not qualifying for JV 2 or Varsity and 9 <sup>th</sup> graders who petition for placement in JV1 |
| Varsity          | Current Season 9 <sup>th</sup> , 10 <sup>th</sup> , 11 <sup>th</sup> and 12 <sup>th</sup> graders qualifying for Varsity   |

### CATEGORY PLACEMENT

Placement in ability-based categories is based on prior year performance in the top 2 races or performance in the top 1 race and overall season results, whichever is higher.

Using prior year finishing percentiles and prior year category, match best 2 races or best 1 race and overall performance. The results of the best of these two criteria determine 2019 category.

| 2019 Season     | 2018 Performance |         |         |         |         |         |         |         |         |         |         |         |         |
|-----------------|------------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|
|                 | 100%             | 90%     | 80%     | 70%     | 60%     | 50%     | 40%     | 30%     | 20%     | 15%     | 10%     | 5%      | 1%      |
| FreshmanMale    | JV2              | JV2     | JV2     | JV2     | JV2     | JV2     | JV1     |
| Freshmanfemale  | JV2              | JV2     | JV2     | JV2     | JV2     | JV2     | JV2     | JV1     | JV1     | JV1     | JV1     | JV1     | JV1     |
| SophomoreMale   | JV2              | JV2     | JV2     | JV2     | JV2     | JV2     | JV1     | JV1     | JV1     | JV1     | JV1     | JV1     | Varsity |
| Sophomorefemale | JV2              | JV2     | JV2     | JV2     | JV2     | JV2     | JV1     | JV1     | JV1     | JV1     | JV1     | Varsity | Varsity |
| JVMale          | JV2              | JV2     | JV2     | JV2     | JV2     | JV2     | JV1     | JV1     | JV1     | JV1     | JV1     | Varsity | Varsity |
| JVfemale        | JV2              | JV2     | JV2     | JV2     | JV2     | JV2     | JV1     | JV1     | Varsity | Varsity | Varsity | Varsity | Varsity |
| VarsityMale     | Varsity          | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity |
| Varsityfemale   | Varsity          | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity | Varsity |

Example: Eddie raced JV Boys in 2018 and had the following race results:

| RACE 1 | RACE 2 | RACE 3 | RACE 4 | RACE 5 | OVERALL |
|--------|--------|--------|--------|--------|---------|
| 18%    | 65%    | 18%    | 13%    | 32%    | 16%     |

His top two races (#3 and #4) don't both meet the varsity criteria (>15%)

His top race (#4) and his overall don't both meet the varsity

→ Eddie is assigned to JV1 for 2019 Season

## START GROUPS

Any category that exceeds or is expected to exceed 75 student athletes based on that race's pit zone registration will be split into equal start groups (start A, start B, etc.) of equal to or less than 75 student athletes. These start groups will be out on the course simultaneously separated by a start time of approximately 3 minutes. Finish order for the

category will be determined in descending order by each student athlete's elapsed time on the course.

*Example: Eddie is assigned to Start Group A which starts at 10:00am. Jeff is assigned to Start Group B which starts at 10:03am. If Eddie finishes at 11:00am he will have an elapsed time of 60mins. If Jeff finishes at 11:01am he will have an elapsed time of 58mins and will have a higher finish result than Eddie.*

Race officials reserve the right to split any category into separate start groups even if there are fewer than 75 registered student-athletes to provide a safe and fair result.

As race registration varies from race-to-race, the start group composition will be determined on an individual race basis. The same staging rules will apply to all start groups. There are no call ups for start group B, C, etc.

*Example: A race has 85 registered student athletes. Two start groups would be formed with start group A consisting of the top 43 student athletes and group B consisting of the next 42 student athletes. If the subsequent race has 77 registered student athletes there will still be two start groups but start group A will consist of the top 39 student athletes. If the following race has 74 registered student athletes there may only be one start group consisting of all 74 student athletes.*

## **FIRST RACE STAGING**

A staging list based on pre-registration will be published on Thursday after race registration is closed and processed. There is no call up for the first race however staging will take into consideration prior season results from the high school categories. The staging process will differ slightly by category as follows:

### **Freshman:**

Staging for Freshmen at the first race will be based on the following staging groups:

1. Each scoring team may submit the top Freshman male and female rider to be staged first, those racers will be staged by their plate numbers according to a sequence randomly drawn from 0 to 9. Independent riders are not eligible for this process. Submissions must be made by the pre-registration deadline and must be made from pre-registered student-athletes.
2. All other pre-registered student-athletes will be staged by random assignment

### **Junior Varsity 2:**

Staging for Junior Varsity 2 at the first race will be based on the following staging groups:

1. Returning racers will be staged by end of season point totals from the 2018 season regardless of category raced
2. Next, all racers who did not earn points the previous season are staged by random assignment

### **Junior Varsity 1:**

Staging for Junior Varsity at the first race will be based on the following staging groups:

1. Staging starts with the top 10% returning JV racers, who did not move to Varsity. They are staged based upon overall points from the previous season. (The top 10% JV racers are calculated from the number of all JV racers from the previous season who are returning to JV).
2. Next, the top 10% previous season Sophomore racers, who did not move to Varsity, are staged based upon overall points from the previous season. (Top 10% previous season Sophomore racers are calculated from the number of previous season Sophomore racers who moved up to JV).
3. Next, all Freshman racers who moved up to JV1 are staged based upon overall points from the previous season.

4. Next, the remaining previous season JV racers are staged based upon overall points from the previous season
5. Next, then the remaining previous season Sophomore racers are staged based upon overall points from the previous season.
6. Next, any racers who petition to race JV are staged according to previous season points. If they did not race the previous season, they are staged based on random assignment
7. Next, all racers who did not earn points the previous season are staged by random assignment

### **Varsity:**

Staging for Varsity at the first race will be based on the following staging groups:

1. Staging starts with returning pre-registered Varsity student-athletes. They are staged based upon overall points from the previous season.
2. Next, the previous season pre-registered JV student-athletes who were automatically upgraded based on JV results are staged according to overall points from the previous season.
3. Next, the previous season pre-registered Sophomore student athletes who were automatically upgraded based on sophomore results are staged according to overall points from the previous season.
4. Next any preregistered student athletes who petition to race Varsity are staged according to previous season points. If they did not race the previous season they will be staged based on random assignment.

### **RACE TWO THROUGH FIVE CALL UPS AND STAGING**

Call Ups and staging for race two through five will be based on the cumulative results of race one through four using a 'drop one average' points methodology.

Student-Athletes who have changed categories during the current season can only use points earned in their current category for call ups and staging.

### **Call Ups:**

Call ups are based on the cumulative points in that category in the current season according to rule 6.13. If a student athlete eligible for call ups is not present at the time of call up, the next eligible student athlete will fill this spot. If the skipped student athlete shows up later, they will be slotted into the spot currently being staged.

### **Staging:**

Staging of non-called up student athletes will be based on average season points in descending order and will be conducted in the following staging group order:

1. Preregistered Student Athletes with points in the current category
2. Newly Upgraded Preregistered Student Athletes with points in a lower category

### **Staging Process:**

The staging and start process can be chaotic and stressful for student athletes, officials, coaches and spectators. Coaches should prepare their racers ahead of time to know what staging group they are in and what order their group is going to be staged via the published staging order document. Fifteen minutes prior to the 1st starting time within each wave, a league official will stage racers who have earned a call-up, followed by the staging groups in the pre-determined order. The official will call each pre-registered racer into the staging chute for each field. Racers need to pay attention for their name/number and enter the staging chute immediately after they are called to do so.

Any student-athlete missing their staging announcement will be staged as soon as possible after notifying the race official. They will be staged into the position that is currently being called. Under no circumstances will they be moved forward of the currently called position. If a

student-athlete missed their entire group staging, they will be staged after all groups within the category have been staged.

## HIGH SCHOOL AWARDS PODIUMS AND RESULTS

### **Individual Race Awards and Podium:**

Podium depth and awards will be five deep. If there are multiple start groups within a category there will not be separate awards or results for each start group, instead all start groups within a category will be combined.

### **Race Series Awards and Podium:**

Podium depth and awards for the entire race series will be five deep.

### **Placement Ties:**

If a tie occurs for a podium spot multiple awards for that place will be awarded but the total number of podium spots will not be expanded unless the tie is for the last podium spot. This is an unusual circumstance for individual races where position is determined by time but could occur for end of season results which are based on points.

*Example: if there is a two-way tie for 1<sup>st</sup> place then two 1<sup>st</sup> place medals will be awarded and no 2<sup>nd</sup> place medal will be awarded. If there is a two-way tie for 5<sup>th</sup> place, then both student athletes will be awarded a 5<sup>th</sup> place medal*

### **Bonus Points for Completing all Races:**

A Race will be considered completed if the student-athlete is recorded as completing at least one lap of a multiple lap race.

### **Category Leader' Jersey:**

The category leader's jersey will be awarded to the student athlete with the most points using 'drop one average' methodology. If there is a tie, all tied student athletes will be awarded the leader jersey.

## PASSING

---

The rule book contains many rules that are applicable to passing. These rules will be enforced, and all student-athletes are expected to know and follow these rules. These are primarily known as the:

### **Who You Want to Be Rules:**

2.10: Positive Sporting Attitude

6.15: Passing Slower Student Athletes

### **No, You Do Not Have to Yield Rules:**

6.18: Leader Owns the Trail but Cannot Block

### **Yes, You Must Yield Rules:**

6.16: Bike Pushers Must Yield

6.17: Lapped Riders Must Yield

## PASSING INTERPRETATIONS

No rule or interpretation can cover all contingencies. As passing situations are very dynamic it is unlikely that any one observer will have a vantage point to see the entire situation unfold. For this reason, it is incumbent on the student-athletes to follow good practices and understand the rule as well as its spirit. From a league perspective the following interpretation of the rule book will be used:

- On single track, the leading rider does NOT have to move over for a challenging student-athlete in the same category
- On double track, the leading rider does NOT have to yield the preferred track to a challenging student-athlete in the same category
- If there is not two-way communication between the leading rider and challenging rider then a pass should not be undertaken
- The league expects that the leading rider and the challenging rider WILL communicate with each other.

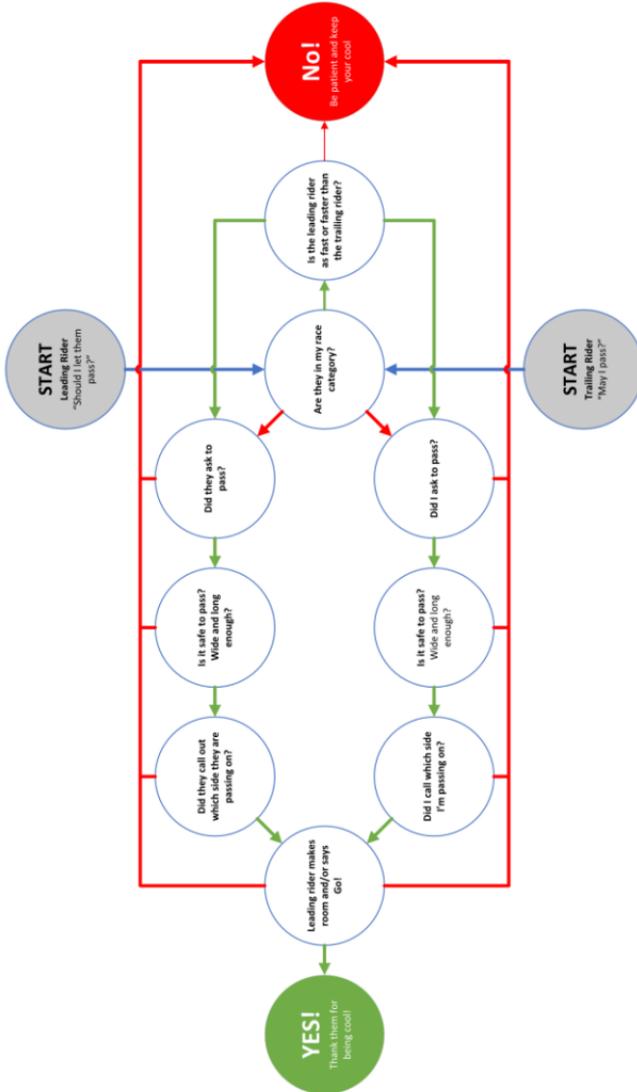

- Refusing to yield to a challenging rider in the same category to establish a tactical advantage early or late in the race may be appropriate
- Refusing to yield to a challenging rider in the same category to “mess’ with them when there is no competitive reason is not appropriate

In all cases, it is important to remember that showing respect to others gets respect. The decisions made to yield or refuse during a race may have implications on how the student-athlete and team are viewed by their peers. NICA’s goal is to build strong minds and bodies and this will always take precedence over race results.

#### PASSING METHODOLOGY

The following flow chart describes the Idaho Passing Method.

## WEATHER/AIR QUALITY PROTOCOL AND REFUND/TRANSPORT POLICY

---

Unlike many other youth sports, mountain bike racing is a highly weather dependent activity. The IICL must evaluate many factors regarding the impact of moisture, temperature and other environmental conditions on the safety of participants, spectators, staff and volunteers along with the [long-term impact on the trail systems](#) and venue.

Any decisions regarding cancelling, postponing, or altering race start times, lap lengths, number of laps, etc. will be made jointly by the League director, the land manager, and the chief referee. Often, this decision cannot be made until the morning of the race due to the unpredictable nature of wet or stormy weather, or acts of nature such as lightning, forest fires, etc.

### IICL WEATHER AND ACTS OF NATURE GUIDELINES

Races are held on their scheduled dates unless the racecourse on the day of the race is deemed un-rideable and dangerous.

- The IICL will have the option to move the race to the Sunday of the same weekend if the weather or act of nature has created dangerous conditions on the scheduled race day.
- The IICL will have the option to delay the start of a race from the published times if the weather or act of nature has created dangerous conditions.
- Courses and/or lap lengths may be altered or shortened because of weather conditions. Last minute changes will be broadcast to racers at the start of each wave. If conditions require a change in number of laps during a race, a race official will be stationed at the lap line advising riders of the change.
- When possible, the IICL will develop a wet weather course alteration in case of extremely wet conditions that threaten the trails used for the race.

- All racing will stop immediately in the presence of lightning as signified by the chief referee. Racing may continue once the league director, chief referee, and chief marshal have determined it is safe to do so.
- Re-starting a race that has been stopped due to lightning;
  - depending on schedule and number of laps completed, the race may be declared over
  - if time permits, racers will be able to resume laps beginning from the start line

### IICL AIR QUALITY GUIDELINES

The IICL will follow the Idaho DEQ recommendations as adopted by local school districts. Current air quality readings as well as forecasts can be accessed online at [airnow.gov](http://airnow.gov).

- Green and Yellow Air Quality Index (AQI) –No change in IICL races.
- Orange AQI-Length of races may be shortened.
- Red AQI-IICL will cancel all scheduled races.

The IICL will assess the forecast as well as the current air quality readings. Decisions to cancel or alter an event due to unhealthy air quality conditions will be made as early as possible.

### COMMUNICATION/REFUNDS/RESCHEDULING RACES

- Communication of delays, changes in start time, courses, and so on will be made by the IICL as follows:
  - on the league web site prior to the race day, if possible
  - on the public-address system on the race day
  - on IICL social media platforms
  - via emails to team directors and all participant email addresses in the IICL database
- IICL will not refund fees due to inclement weather, acts of nature or air quality conditions
- IICL does not allow registration transfers to subsequent races

- The only race with a make-up/reschedule date is the state championship. Any other race throughout the season that is cancelled will not be rescheduled. The IICL has a very short window in the fall to complete the season with limitations due to school starts and the onset of winter. We also take into consideration religious holidays that preclude holding races on certain weekends.
- The Membership Fee and Season Pass Fee are partially refundable for a season-ending injury. A doctor's note must be provided. Fees will be prorated based on the number of months into the season the injury occurred. Individual Race Fees are non-refundable.

## TEAM STRUCTURE

---

The long-term objective is for every student-athlete to be able to have a team on which they can participate. Ideally, they can represent their school in their chosen sport; however, this may not be possible in areas without enough interested student-athletes or coaches. In these areas composite teams can be formed based on geographic boundaries that encompass several school boundaries. Student-Athletes who are homeschooled are also encouraged to participate and by state law must be accommodated.

## SCHOOL TEAMS

Have the same geographical boundaries of the school represented. Does not need official affiliation with the school but can be a club sport within the school. Each school can only have one team

A student-athlete who lives within a school-based team's boundaries and does not attend a different school must join the school-based team unless an exception fits their circumstances.

School teams are open to Students who:

- attend the school

- live within the school's boundaries but attend a different school without a team
- homeschooled and
  - no homeschool county-based team available
  - not dual enrolled in a different school with a school-based team

## COMPOSITE TEAMS

Create the ability to group student-athletes from multiple schools in order to form a team. Composite Teams must have a specific defined geography. Composite Teams cannot overlap with other Composite Teams or School Teams unless they are a County Homeschool Team.

Composite Team are open to students who:

- Attend a school within the geographic boundaries of the Composite Team
- Live within the Composite Team's boundaries and attend a school outside the composite team's boundaries that does not have a school-based team

A student who is not a public school student may participate as a member of the Idaho League team for a public school if the student fulfills the following requirements: (a) the student is entitled to dual enroll in the public school under Idaho Code Section 33-203; (b) the student is dual enrolled in the public school; (c) the student satisfies the academic eligibility or proficiency requirements of Idaho Code Section 33-203 to participate on the public school's Idaho League team.

## INDEPENDENT STUDENT-ATHLETES

A student who lives in an area that is neither served by a composite team or a school-based team may

- join a nearby composite team if the composite team expands its designated geography

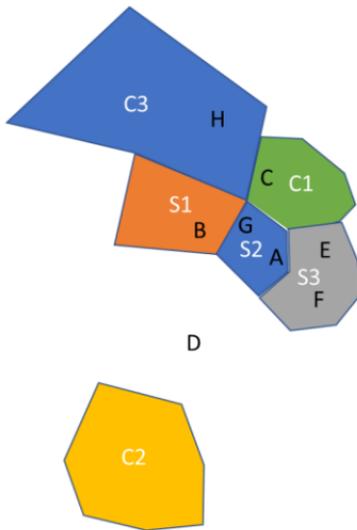

- join a nearby school-based team, if district rules allow non-students to participate; this school-based team will not be converted to a composite team
  - The choice of teams to join will be the student-athlete's
- Race as an independent

### OTHER SITUATIONS

A student who relocates may choose to transfer to the team that best fits the rules -or- may choose to remain with their old team with agreement from old and new coach

A student who lives at two addresses covered by two teams may choose which team to join as long as the team contains one of the two addresses or school of attendance

**Examples:**

A lives in S2 boundaries and attends S2 school

→ A will join S2

B lives within S1 boundaries but attends a school in S3 boundaries

→ B will join S3

C lives within C1 boundaries and attends a school in C1 boundaries

→ C will join C1

D lives in an area not covered by a composite team or school team

→ D can choose to join C2, S1, S2 or S3 but not C1 or C3

E is homeschooled and lives in S3 boundaries

→ E will join S3

F is homeschooled and lives in S3 boundaries but is dual enrolled in S2

→ F will join S2

G lives within S2 boundaries but attends a school not covered by a school or composite team

→ G will join S2

H lives within C3 boundaries but attends a school in C1 boundaries

→ H can join either C3 or C1 composite team

All Rules in the current Rule Book will be in effect as written.

Change Log:

| <b>Date Approved</b> | <b>Change</b>   |
|----------------------|---|
| <b>June 26, 2018</b> | Initial Issue   |
| <b>July 30, 2018</b> | Change to Rule 8.8 and 8.9. Podium Depth and Series Awards will be five deep regardless of category size.               |
| <b>July 1, 2019</b>  | Major rewrite. Updated for Round Robin Implications, Ability Based Scoring, inclusion of passing guidelines and weather |
